BELGRADE UNIVERSITY AND YUGOSLAV MARITIME SCHOOL
 TO ADMIT NEW STUDENTS

BELGRADE TO ADMIT 1,353 NEW STUDENTS IN 1951 -- Belgrade, Politika, 18 Jun 51

The Council for Education, Science, and Culture of Serbia has decreed that, beginning with the 1951 school year, first-year students will be admitted to Belgrade University on the basis of the actual needs for highly qualified professional people, school facilities, and competitive entrance examinations. Slobodan Radojevic, secretary of Belgrade University, explained that, on the basis of school facilities, 3,173 students will be admitted to the university, 760 to the graduate technical school, and 420 to the graduate medical school. Registration for competitive entrance examinations to all colleges will be conducted at the same time, but applicants may compete for entrance to only one college.

Whenever considered necessary, colleges may hold additional competitive exams to acquire their full number of students or to obtain students who are better qualified. Entrance examinations and their results, registration of students, and the decree on selection of stipendiaries for their first year's study will be announced in September so that classes may begin on 1 October. The results of entrance examinations and secondary school grades will be considered in accepting individual students.

Entrance examinations will be both written and oral on certain subjects taught in the individual colleges; material selected for examinations will be taken exclusively from the secondary school curriculum. For instance, the College of Economics will give a written examination including a theme on general economic problems and a problem in mathematics and economic geography. The law school will give a written examination on historical and social problems. The graduate technical school will give an examination in mathematics for all its colleges. The medical college will give a written examination on natural science, etc.

STAT

The secretary of the university announced that the College of Economics will admit 220 full-time and 180 part-time students in 1951; the forestry school, 75; the law school, 1,500; the veterinary school, 120; the natural science and mathematics schools, 405 in all; the school of agriculture, 150; and the school of philosophy, 653.

The graduate technical school will admit 70 students to the College of Architecture; 210 to the construction school; 150 to the machinery school; 130 to the electrotechnical school; 90 to the technological school; 70 to the school of mining; and 40 to the geology school. The advanced medical school will admit 70 new students to the school of pharmacy; 50 to the school of stomatology; and 300 to the school of medicine.

Students who fail in their entrance examinations for one college may apply to another college. Students may compete for admission to colleges in other republics than their own but must have permission from the Council for Education, Science, and Culture of their own republic, and approval from the Council for Education, Science, and Culture of the republic where they wish to study.

ADVANCED MARITIME SCHOOL TO ADMIT NEW STUDENTS -- Split, Slobodna Dalmacija, 9 Jul 51

The Yugoslav Ministry of Marine will admit 50 new students to the advanced maritime school during the 1951 - 1952 school year. Twenty students are to go into the maritime economy section, 15 into the nautical, and 15 into the ship-engineering section.

Allowances will be granted according to the decree on allowances. Graduates of the school will have advanced skills in the merchant marine or maritime economy.

Yugoslav citizens who have completed courses in a maritime technical school or their equivalent in a technical or secondary school may apply. Applicants must also have completed 2 years of practical work in the merchant marine, the maritime economy, or in related enterprises, such as deck service, if applying for the nautical section, engineering service, for the ship-engineering section, or in the maritime economy (transport, foreign trade, etc.), for the maritime economy.

Applications must have a 10-dinar tax stamp affixed and must be forwarded to the director of the advanced maritime school in Rijeka by 15 August. The following attachments must be included: a personal history statement; statement of preference for the particular section desired; proof that applicant has done the practical work required; and a transcript showing that he has completed the required schooling. Applicants for the nautical and ship-engineering sections must present certification that they have passed examinations for ship engineer, second or third class; and for the maritime economy section, proof that they have passed a technical examination, or a promise they will pass it before the end of 1951.
